

WJEC Gender Pay Gap Report 2022

WJEC is committed to the principle of equal opportunities and equal treatment for all employees, regardless of sex, race, religion or belief, age, marriage or civil partnership, pregnancy/maternity, sexual orientation, gender reassignment or disability. WJEC has a clear analytical Job Evaluation process, which provides assurance that employees are paid equally for the same or equivalent work, regardless of their sex (or any other characteristic set out above).

WJEC is therefore confident that its gender pay gap does not stem from paying men and women differently for the same or equivalent work. There are mitigating factors to take into account when considering the gender pay gap, such as:

- The upper middle quartile includes a number of technology based roles. Government figures for 2019 show that women make up only 16.4% of all employees in ICT professional occupations and represent just 19% of computer studies graduates. These statistics affect the ability to recruit women to these types of roles.
- Part time roles typically attracting females who wish to work flexibly.
- The mix of individuals being paid statutory maternity pay at the snapshot date, and therefore not included as full-pay relevant employees.
- The increase in the headline figure for the mean gender pay gap from 4.88% to 5.79% has been caused by staff turnover. In particular 37 new starters, of which 23 are female and 14 males. The mean gender pay gap for this group is 12.28% and has had an impact on the headline figure.

The table indicating pay quartiles by gender shows WJEC's workforce divided into four equal-sized groups based on hourly pay rates.

A key feature of our workforce is that we have more women than men within the upper quartile of hourly pay rates and a fairly even split when Q1 and Q2 are combined (46.41% of the Upper and Upper Middle quartiles are males, with 53.59% being female). These quartiles include management posts as well as posts requiring recent and relevant experience of teaching, and data shows that recruitment into these posts is evenly balanced in terms of numbers of men and women.

Whilst WJEC's gender pay gap compares favourably with that of organisations across the whole UK economy, WJ1 0 0 1 105.14 299.21 Tm0 g0 G[W]9(JE)4(C)]TJETQq0.000008871 0 595.3e Tf1 0
